LENGTH OF THE HUMAN HAIR .- The ordinary length of the hair of the head, as deduced from its measurement in women, ranges between twenty inches and a yard, the latter being considered as unusually long. But in some instances the length is much greater; as in the case of the lady in whom, I am informed, it measures two yards, and trails on the ground when she stands erect. When, however, hair is kept closely shaved, it appears to become persistent, and at the same time increases in strength and bulk. It has been calculated by a carious investigator (Withof) that the hair of the beard grows at N. W. corner of 3d and Union sts., between Sprus the rate of a line and a half in the week, this painting of a carpenter whose beard was nine feet long, so that when engaged at work, he was obliged to carry it in a bag; and that the burgomeister, Hans Stomingen, having ment to society, has faded from the earth. upon one occasion forgotton to hold up his beard, trod upon it as he ascended the staircase leading to the council chamber of Brunn, and was thereby thrown down and killed. Wilson on the skin.

A SINGULAR PLANT .- A communication has been recently made to the London Linnamn Society, covering a letter from the northern part of India, giving an account of a plant found there, which, when chewed, actually destroys the power of the tongue to appreciate the taste of sugar. It if the gymnema sylvestre ; lat. ord. Aselepiadea and goes by the name of Indian plant. Two hours after chewing some of the leaves, the aroma of tea could be appreciated, but the sugar with which it was sweetened could not be detected. The impression remains about twentyfour hours, sugar all the while feeling like sand on the tongue. It is suggested that this may lead to some important physiological discoveries in regard to the organ of taste.

SIX YEARS AGO

FERHE children began to cry for Sherman's Lozenges. The noise was not as loud at that time, but it has kept increasing ever since, and now has become so great that the mouths of the little ones can scarce be stopped. Dr. Sherman sympsthises with the little sufferers, and very much regres that any of them should be disappointed. Knowing the vast benefit which has been conferred upon the community by the introduction of

WORM LOZENGES. he has entered into arrangements for enlarging his Manufactory, by means of which he thinks he will bo able to supply the demand. And the same pains and care will be taken, that these celebrated Lozenges be made as they have always been, in order that those who depend epon them, may not be disappointed in their hopes. He knew when he commenced the manufacture of the Worm Lozenges, that they would supersede the use of every other vermifuge, as the Legenge is very pleasant to the taste, speedy in its effects, as well as certain, and the quantity required to effect a perfect cure is very small. These properties, in connexion with the fict that they are sold for 25 cents per box, thus placing them in the reach of the poorest man in the land, has not only caused them to take the place of every other vermifuge ever offered, but al so rendered them popular to the community.

COUGH LOZENGES continue to cure Coughs, Golds, Gonsamption, Asthua, shortness and difficulty of Breathing, and other disca es of the Lungs, with the same facility they did on their first introduction, and the prople have now become persuaded by actual experience, that on the accession of a light cold, they have only to step to either the Dr's, office, or one of the Agents, and obtain a box of his Cough Lozenges, which are very convenient to carry in the pocket. and to take a few through the day. By pursuing this course a cure is often effected in 24 hours, and the patient about his business. So great is the colebrity of the Lezenges, that thousands of persons who have used them, and become acquainted with their effects, will never be without them.

SHERMAN'S POOR MAN'S PLASTER has cared more cases of Rheumatism, Pair in the Back, Side and Chest, Lumbago and Wickness, than any application that has ever been made. As the colebrity of the Plaster has increased, hundreds of unprincipled rareals have attempted to counterfeit it, and palm it off upon the community as the genuine. (7) Beware of Deception. Vegetable Universal Pills, The only known Medicine that at the same tim purges purifics and strengthens the system.

Lownon, July 7, 1846.

R. LE ROY'S Pills are a new medicine which has just appeared, and is fast taking the places of all others of the same class. These pills are composed of many ingredients, but the iwa principal ones are Sarsaparitia and Wild Cherfalled ry, so united that they act together; the one, brough its admixture with other substances, pu rifying and purging, while the other is strengthen ing the system. Thus those pills are at the same time tonic and opening; a desideratum long and eagerly sought for by medical men, but never before discovered. In other words they do the work par of two medicines, and do it much better that any par two we know of; for they remove nothing from the system but the impurities; so that whate they purge they strengthen; and hence they cause no debilitation, and are followed by no te-action. Dr. Le Roy's pills have a wonderful influence on the but they remove all nextous particles from the chyle before it is converted to a fluid, and thus make imoure blood no utter impossibility. As there is no ebilitation, so there is no nauses or sickness etording the operations of this most excellent of me-icines, which never strains or tortures the digustive functions, but causes them to work in a perectly natural manner; and hence persons taking thein do not become pule and emiscisted, but the contrary; for while it is the property of the Sarsaparilla, united as it is with other ingredients, t emove all that is foreign and impure, it is equally the property of the Wibi Cherry to retain all that natural and sound; and hence a robust state of ealth is the certain result of their united opera-

dions. (C) Price 25 cents per BOX,
